Voluptuousness Universe

SAUNA

Temperature between 60 and 70 degree. Moisture at least than 10%. Relaxing action, dilation of the blood vessels and increasment of the cardiac rythm; enhancement of immun defenses, endorphin release. End by cooling the skin with the waterfall bucket, a “cold mist” shower or a frozen rub.

ICE FOUTAIN

This fountain produces a thinly crushed ice which has a invigorating and tonic effect on the body. Rub the ice on the different parts of your body : this experience stimulated the blood circulation, tone the skin, release the joints and can be repeated several times during the journey. Important after the sauna and the hamman.

Fountain sharped in a single block of stone of Burgundy by a French craftperson of the year from the region.

HAMMAM

The first hamman is a “caldarium” around 40 degree, with a moisture around 80% which favorise the muscular relaxation, and the elimination of toxins. The second part of the hamman is a “satured steam bath” close to 45 degree and a moisture of 100%.

WATERFALL BUCKET

Traditionally associated with the sauna, the waterfall bucket is a pleasure of extreme simplicity, a surprise highly refreshing and invigorating by making pour 20 liters of frozen water on your body.

EXPERIENCE SHOWER

Thanks to its 3 different programs, discover the delight of an unique shower offering a new experience :

- Cold Mist
- Tropical Rain
- Caribbean Storm

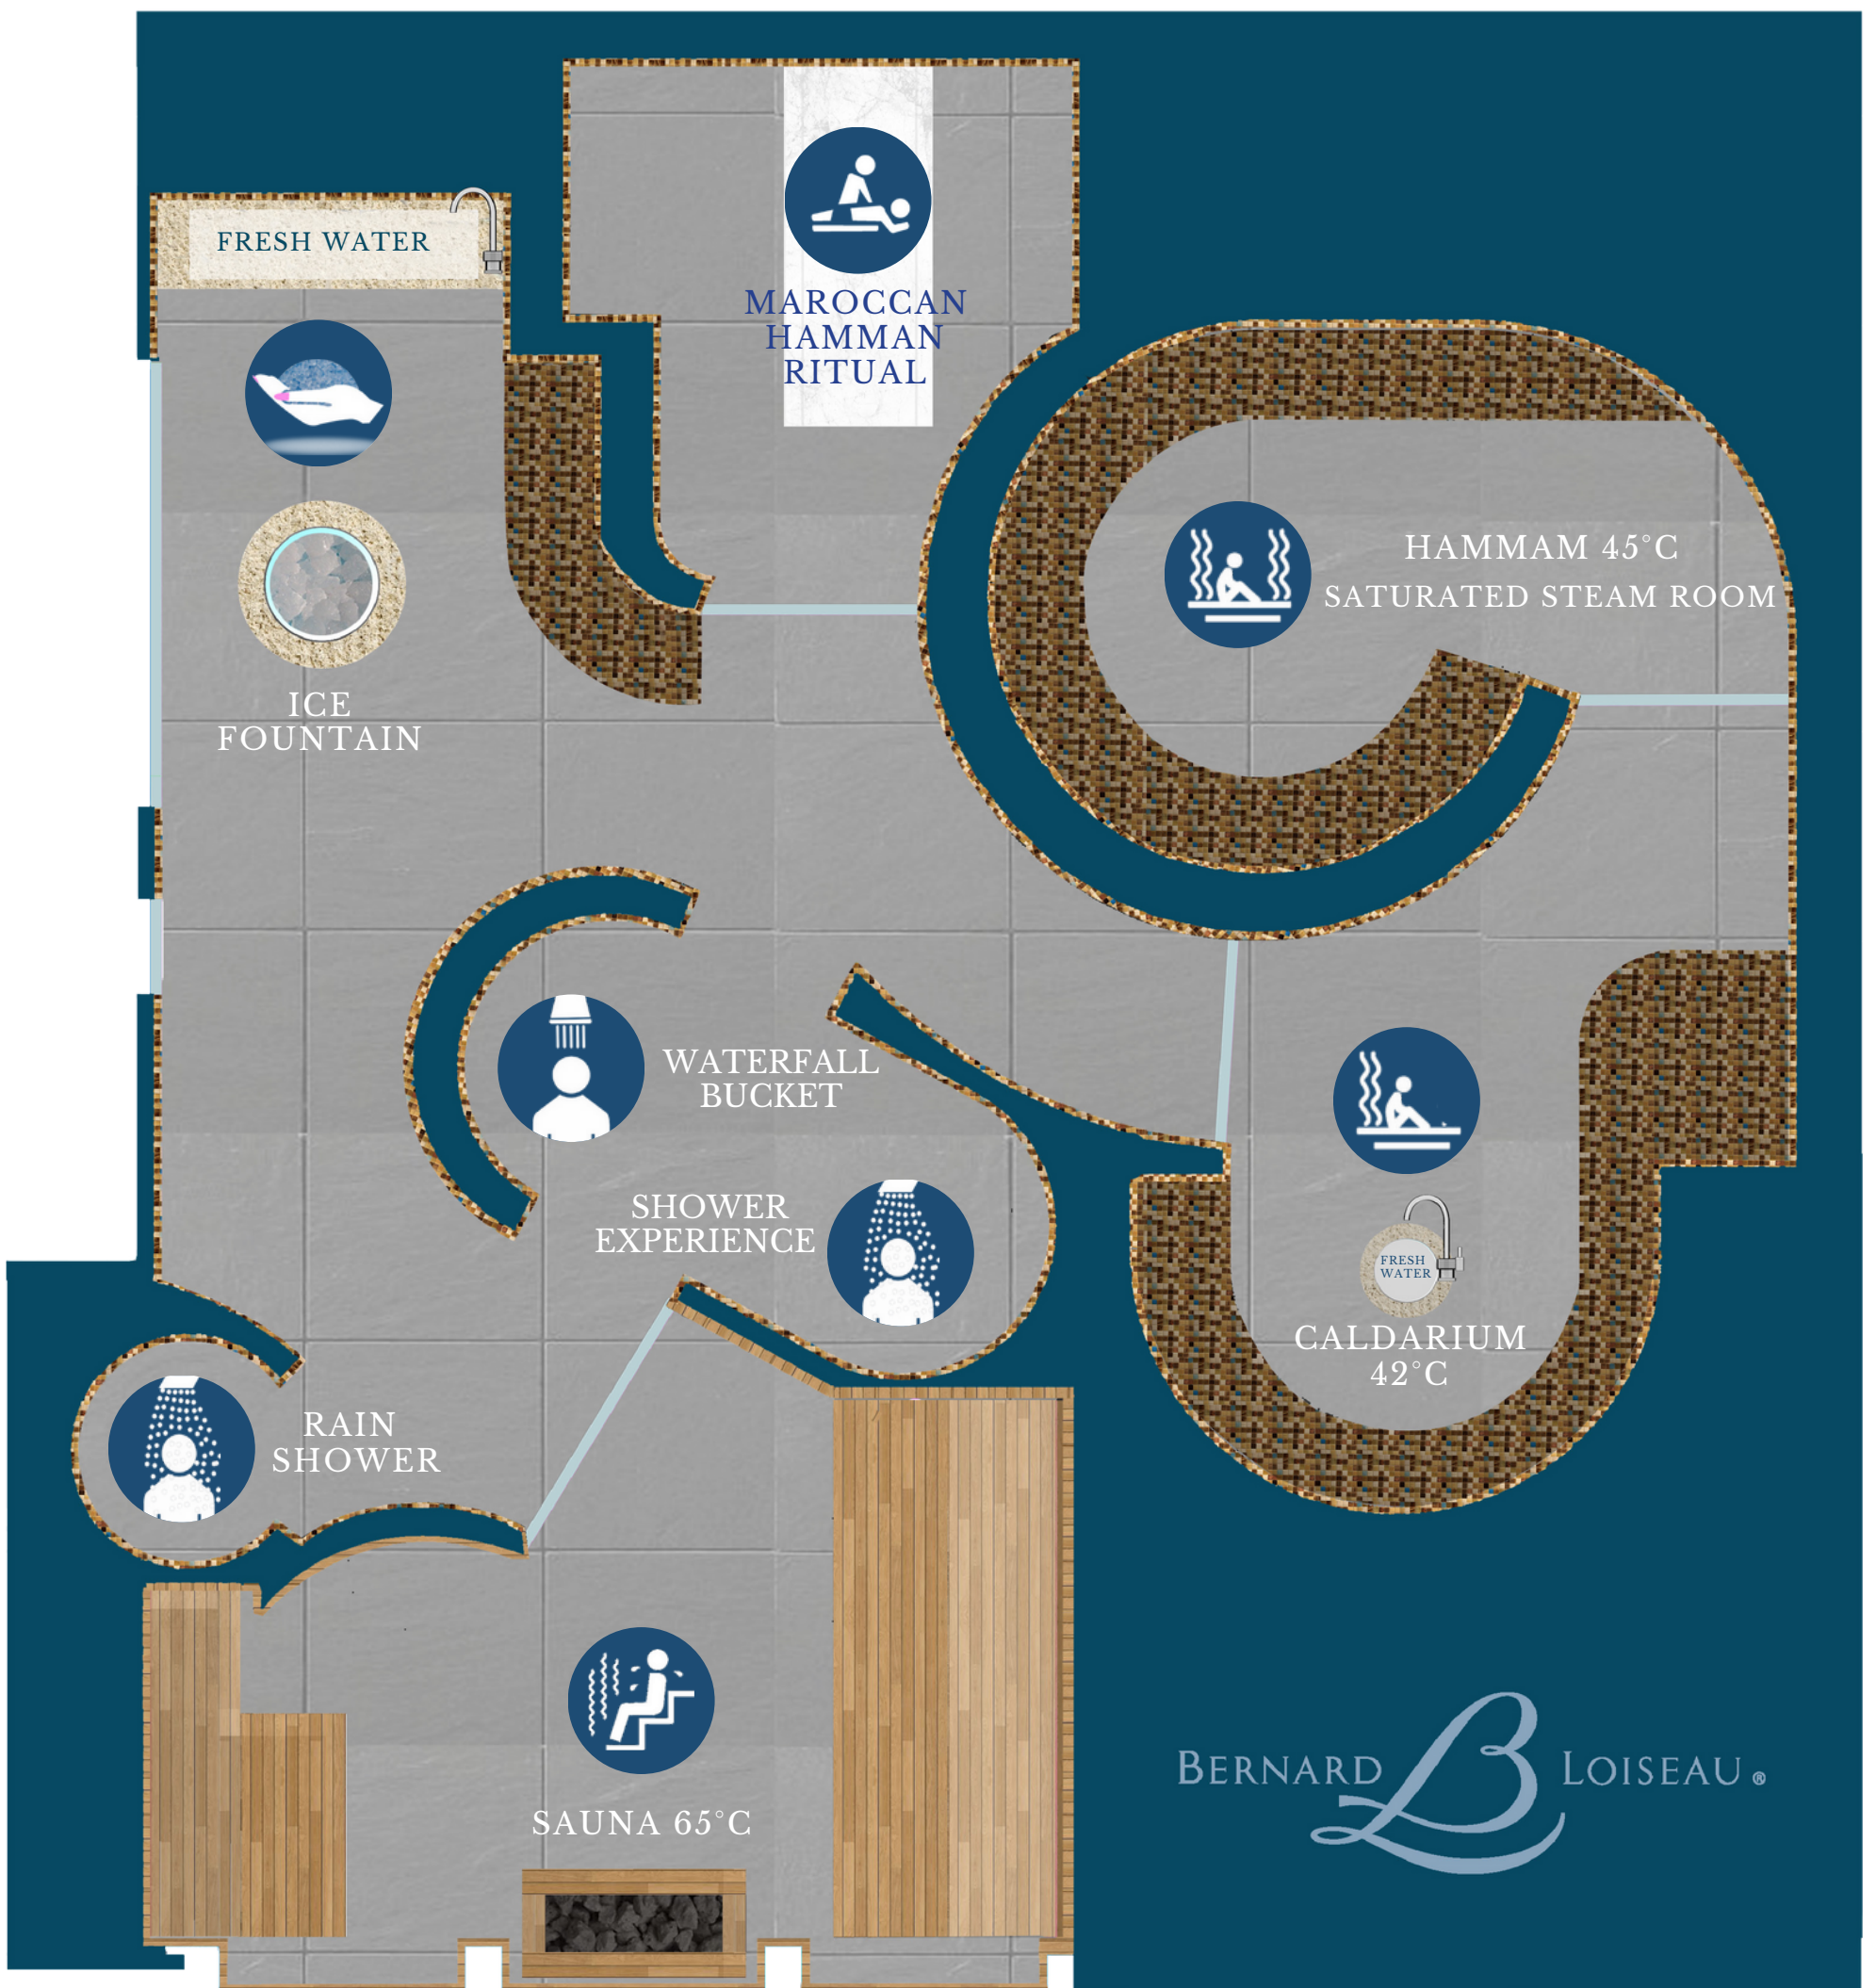

ORIENTAL HAMMAM RITUAL
