

Multi-Sensory Universe

PHLEBOLOGICAL JOURNEY

A walking channel promoting drainage, relaxation, activation of circulation, and deep muscles, by walking in cool water (18°C), with counter-current jets at thigh level.

DRAINING AND RELAXING BENCH

With a water depth of 1 meter, it creates a sensation of weightlessness, offering both a draining and relaxing effect through jets and bubble streams on the floor.

COBRA & SWAN NECK JETS

The powerful jets of the Cobra and Swan Neck provide massage according to your position: back, shoulders, neck, etc.

CONFIDENT CHAIR

Offers a pleasant and deep massage of the lower back and legs, thanks to two specific jets (wide diffusion angle, high flow rate).

4-JET STATION

4 jets along the pool at different heights to target calves, thighs, hips, and back.

BUBBLING BEACH

At the end of the relaxation area (behind the Hydronox sofa), the semi-reclined position allows for a leg massage with the torso gently floating.

AQUABIKE

Muscular effort at your convenience and excellent limb massage while pedaling against a water current. Vary positions and types of pedaling.

HYDRONOX SOFA

Lying on this stainless steel sofa, you will be enveloped in a whirlpool of small draining and relaxing air bubbles.

MASSAGE ALCOVES

Enjoy a full standing massage of the torso, belly, and hips with 3 jets, adjusting your position using wall handles.

RELAXATION BEACH

This water area offers relaxation and a friendly atmosphere.

EFFERVESCENT BEACH

Shallow water and effervescent thanks to a profusion of air bubbles.

GEYSER

Bursts from the floor with bubbles and high-pressure water for a whirlpool effect. Guaranteed invigorating sensation!

SWIMMING AREA

Beautiful counter-current swimming zone, effective and pleasant.

PHLEBOLOGICAL JOURNEY

World of Delight

SAUNA

Temperature between 75 and 90°C. Humidity below 10%. Relaxing effect, distension of blood vessels and increased heart rate, improved immune defenses, and release of endorphins.

Finish by cooling the skin with the cascade bucket or a friction of ice.

HAMMAMS

The first hammam is a "caldarium" at around 40°C, with humidity around 80%, promoting muscle relaxation and toxin elimination. The second part of the hammam is a "saturated steam bath" close to 50°C with 100% humidity.

EXPERIENCE SHOWER

With its 3 different programs, discover the pleasures of a sensory shower offering an experience of a cool tropical storm or a warm tropical rain.

ICE FOUNTAIN

This fountain produces finely crushed ice that has a revitalizing and toning effect on the body. Rub the ice on different parts of the body: this experience stimulates blood circulation, firms the skin, relieves joints, and can be repeated multiple times throughout the journey. It is especially important after the sauna and hammam

CASCADE BUCKET

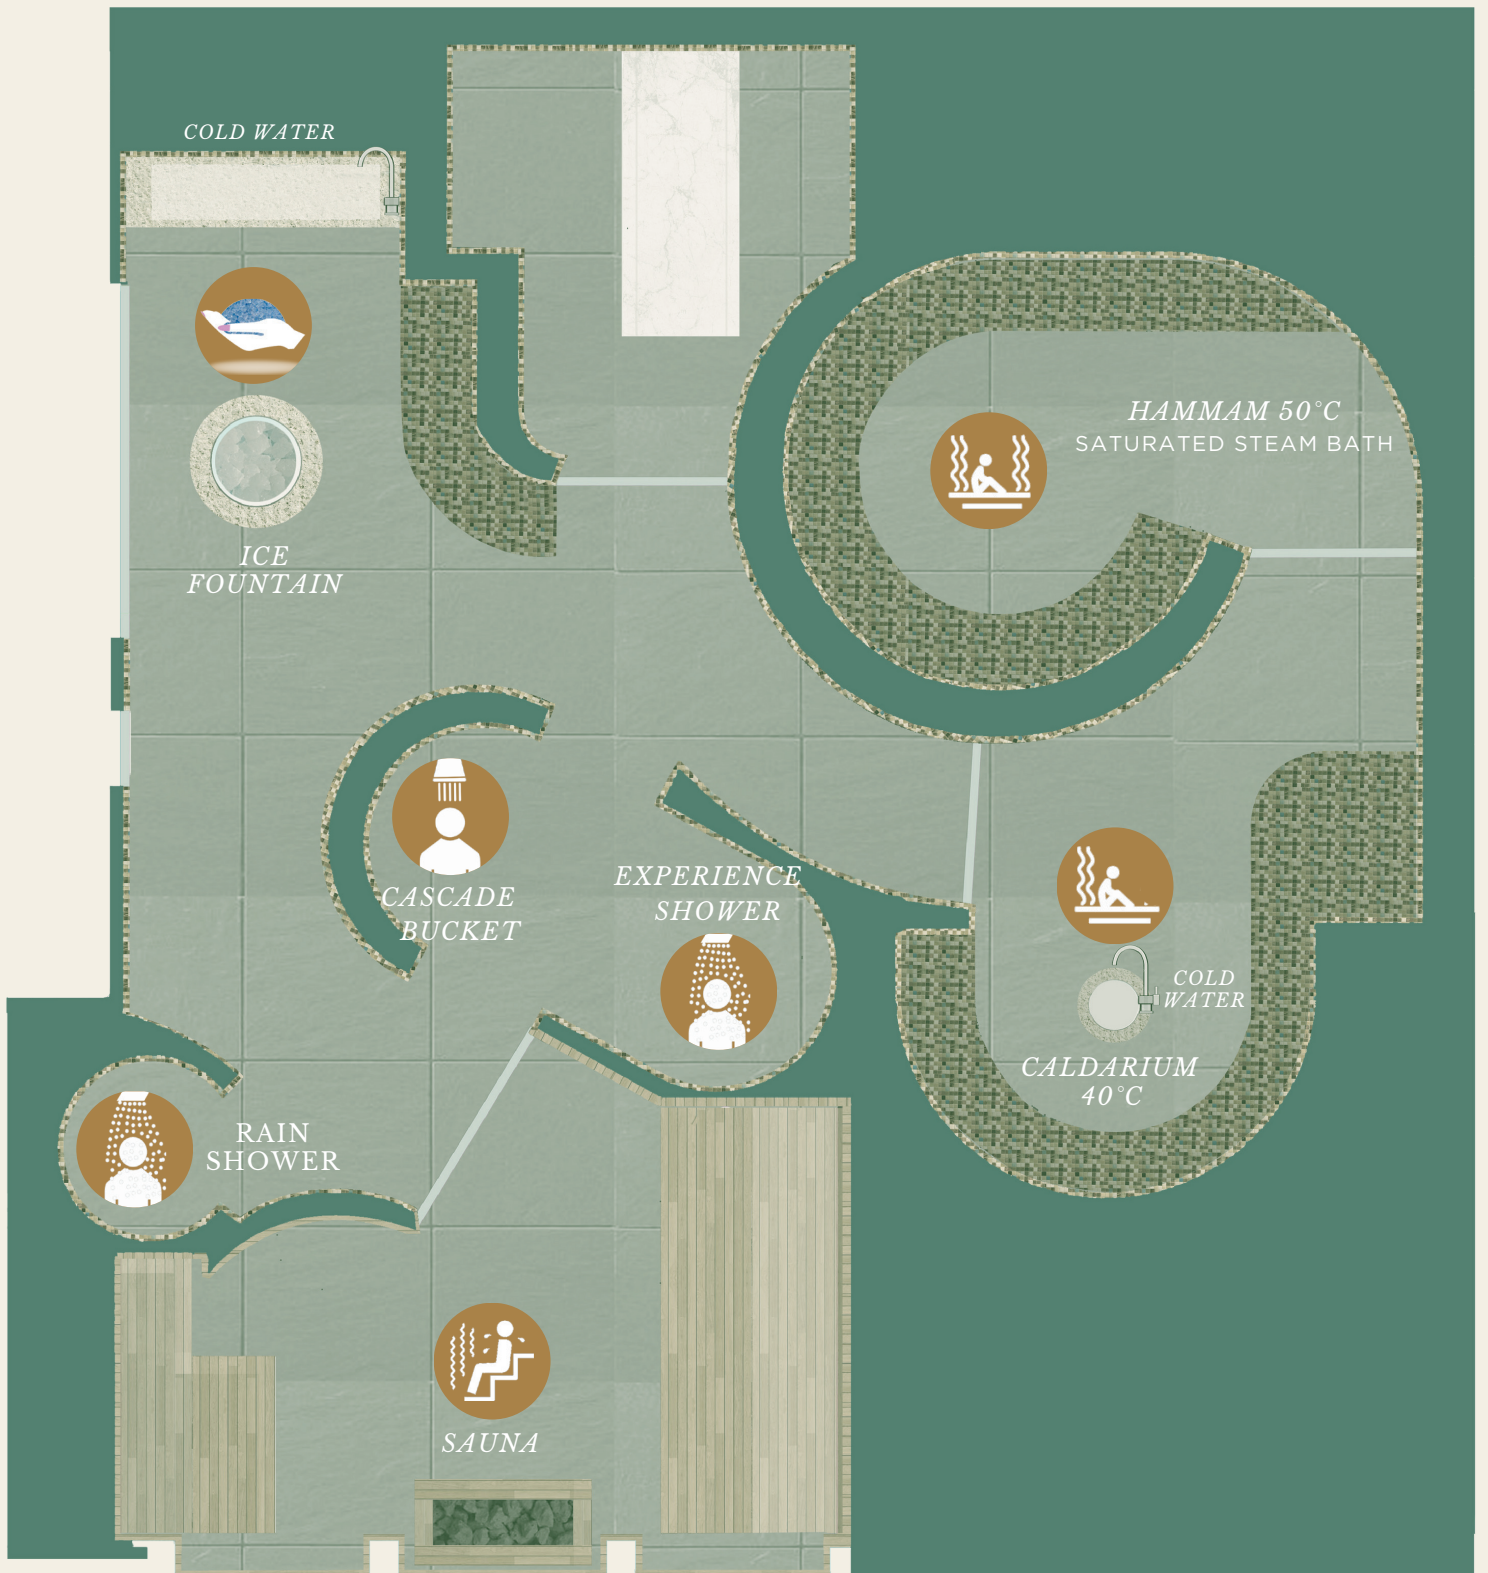

Traditionally associated with the sauna, the cascade bucket offers a pleasure of extreme simplicity—an intensely refreshing and toning surprise by pouring 20 liters of ice-cold water over your body.

SEA BREEZE CABIN

The sea breeze cabin features heated benches and mosaic seating (air at 38°C). The air contains iodized salt and is similar to that of a tepidarium (a warm room that provides the benefits of sea air).

The fountain is carved from a single block of Burgundy stone by a Master Craftsman of France from the region.
